

## **Notification - May 28, 2015**

### **Mississippi, Rhode Island and Maine Unemployment Insurance Consortium Infrastructure as a Service Request for Proposal**

This notification is being issued to notice interested vendors of pending modifications to the RFP document issued on April 20, 2015.

Within the next few weeks, ITSC in conjunction with the MRM Consortium plans to issue an amendment to the RFP that will include an extension of the IaaS base contract duration with modified renewal options. As a result of this change we will host a second bidders webinar/teleconference for clarification questions from interested vendors followed by another new question and answer period.

The amendment will extend other components of the timeline including RFP schedule of events and the proposal submission date. Our intent is to allow interested vendors additional time to modify submit their proposals for this modified solicitation.
